Secure Coding Lab - 7
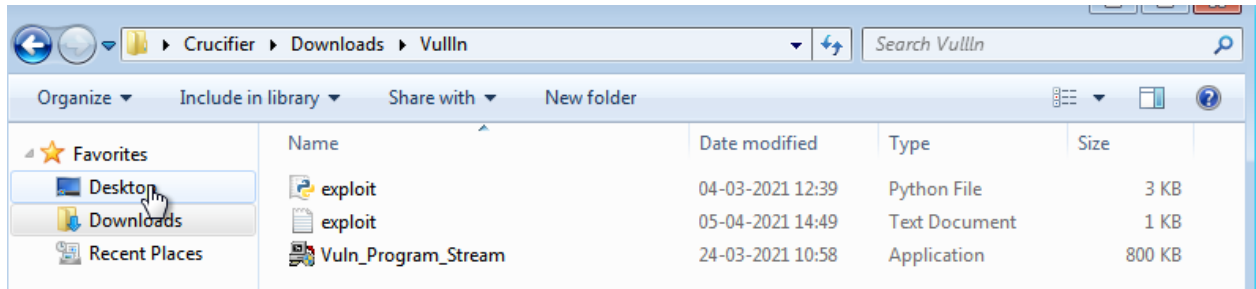

Name: Tejeswar Allaka

Reg No: 18BCN7033
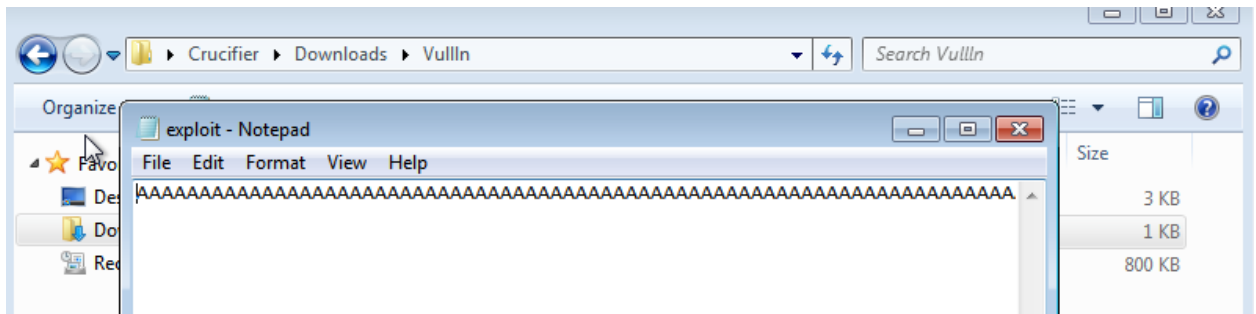

1) Firstly, download Windows 7 in virtual machine

2) Download python and generate the payload by running the exploit.py file.

3) Next, you install Steamx ripper software by ignoring all the notions that windows throws at you saying that its a vulnerability.

4) copy , paste the generated payload.

5) Fiddle around with stream ripper and paste the exploit in different text areas, until you find the vulnerability.

6) Vulnerability found!!!!!!!!!!!!!!!!!!!!
